

## IOEMA-1 Establishes New Headquarters in The Netherlands

Rotterdam, Netherlands – 20<sup>th</sup> of February 2026 - I'm pleased to share an important milestone for our project: IOEMA-1 has been formally incorporated as a business entity in The Netherlands, enabling the establishment of our new headquarters in Rotterdam, half an afternoon's bike ride from our planned landing in The Hague.

This strategic move strengthens our operational foundation and was a necessary step to ensure full eligibility for key European funding instruments—particularly now that IOEMA-1 has been added to the CPEI (Cable Projects of European Interest) list.

Positioning the project within the Dutch innovation and regulatory ecosystem not only enhances our grant readiness but also aligns us with Europe's broader ambitions for resilient, secure, and future-proof digital and energy infrastructure.

We look forward to the next phase of engagement with institutional partners, industry stakeholders, and EU bodies as IOEMA-1 continues to build our international presence.
